Personal Projects

COLLEGE ENQUIRY CHATBOT

Jul. 2023 - Sep.2023

- Designed and implemented an interactive College Enquiry Chatbot to facilitate seamless communication for students, using Python, AI and ML. This innovative solution streamlines information retrieval, providing quick and accurate responses to user queries, and enhances overall user engagement in the college's inquiry process.

CARA

NOV. 2023

- Engineered a dynamic and visually appealing responsive shopping website using HTML and CSS, incorporating responsive layouts and flexible grids to provide a consistent and optimized shopping experience across desktops, tablets, and mobile devices.

INNOVATE-TECH LABS

June. 2023

- Designed and implemented a responsive website leveraging HTML, CSS, and Bootstrap to ensure optimal user experience across a variety of devices. The project involved meticulous attention to detail in crafting a visually appealing interface while prioritizing accessibility and functionality.

Technical Skills

Languages: JavaScript, Python, C, C++

Front-end: React, HTML5, CSS, Bootstrap

Back-end: Node.js, Express.js

Databases: MYSQL, PostgreSQL
